Vision & Mission Statements

Vision Statement:

To be the most sought after PEB contractor for challenging projects in which meeting the challenges of execution, safety, and schedule set us apart from our competition.

Mission Statement:

To provide our esteemed clients with the project implementations to complete their projects with safety on time within budget and with high-quality standards.

About Us

- **Hurricane Vent LLC**, we are popularly known in the Sultanate of Oman, has risen from humble beginnings, as a small trading and services company, to one of the medium sized construction companies in Oman. Construction has been the company's strategic business base.
- The philosophy of Hurricane has always been quality in execution and timely completion of projects, which has been the success of its growth over the period. The recognition and goodwill earned, on account of this philosophy, has stood the test of time and, even today, many clients give the first option to Hurricane to take up a contract, with a right for rejection, before considering others.
- Having been in the business Hurricane has a well-established infrastructure for execution of operations. We have a modern office set up, a central storage yard, transport division.
- **Leadership**

Mr. Mukesh Singh is the OWNER and also holds the position of Managing Director in the Company. He is an Engineering graduate with a vast experience (more than 18 years) in the field of Steel Structure Engineering. Before starting this company, he was associated with many PEB companies of Oman and India.

About Us

- Mr. Singh provides leadership to position the company at the forefront of the industry. He develops strategic plan to advance the company's mission and objectives and to promote revenue, profitability and growth as an organization. He oversees company operations to insure resource utilization, efficiency, quality, service, and cost-effective management of resources. He plans, develops and implements strategies for generating resources and revenues for the company. He approves company operational procedures, policies, and standards.

- **Health, Safety & Environment (HSE)**

One of the prime parameters in the operational set up is the HSE aspect. All personnel are indoctrinated in the essential features of HSE requirements and a strict watch is kept at various levels to ensure that instructions are enforced rigidly in this regard. Management insists on good housekeeping at all construction sites and special awards are given periodically to encourage personnel in maintaining the standards.

About Us

- Quality Management System (QMS)

- QMS has been developed to ensure that requirement for all critical activities are clearly identified, recognized, understood and agreed by all staff involved. The Quality Policy statement encompasses the guiding principles in HV's quest for quality and growth. The system ensures that necessary management and control systems for particular activities are in place, complying with the agreed requirements. Q.A and H.S.E policies are framed and implemented in the company in phases.

- Our Strengths

- We provide one stop solution STRUCTURAL STEEL erection of Sultanate of Oman.
- Since Mr. Singh is himself an experienced engineer with vast exposure to working conditions in Oman he himself also controls the day-to-day operational project activities. His close association with the client during project implementation makes him very approachable. This gives our clients great opportunity to communicate their feed-back very quickly to the highest level of decision making.
- Since there are no hierarchal constraints in the decision making of the company, client feedbacks can be implemented immediately during execution.
- Mr. Singh keeps himself involved in all stages of the project -project initiation, project planning, project execution, project monitoring and controlling and project closure. This helps the project teams (client and contractor) to mitigate any risk that may exist or hit the project. It will be very easy to define risk mitigation plan and their effective mitigation activities because of his involvement at each level of the project.

About Us

- A big chunk of our business has come to us either through client referrals or as repeat business from our clients. This reflects the strong bonding that we have with our clients and confirms that we give high priority to Customer satisfaction in all our implementations.
- For any Sohar based project we have an obvious edge over our competitors. Since our offices, equipment's, workforce and contacts are very strong in this region, it is easy for us to mobilize our workforce or equipment's at any time of project implementation. This helps to effectively and quickly implement any change controls or client feedbacks.
- Achieving the set norms of Quality, Timelines and Safety are the core targets of our operations.

About Us

All our services are provided with

- Safety
- Quality control & testing.
- Clearly documented QITP.
- Third party testing facilities are used where required.
- Documented Method Statements.
- Projects delivered on schedule & within specifications.
